

ES-50V - Eurospring 50 Liters Vertical Water Heater

Datasheet

Features:

- Wall Hung type
- 2-bolts flange
- Original Italian thermostat with built-in safety device
- Pressure safety valve tested at 8 bar comfort
- Temperature regulation efficiency & energy savings
- High thickness steel tank tested at 16 bar
- Exclusive sleek design
- External temperature regulation
- Extra thick polyurethane insulation
- Color - White
- 5 Year Guarantee

Technical Specifications:

Brand	Eurospring
Capacity	50 Liters
Voltage	220-240V (50hz)
Mount	Wall Mount Vertical
Rated Pressure	0.8Pa
IP Rating	IPX1
Max Temperature	83°C
Thermal Cutout	93°C

EUROSPRING electric heaters have been conceived and designed to adapt to any room type and thus offer different installation options. EUROSPRING electric heaters come with different installation options: vertically-installed heaters, horizontally-installed heaters; manufactured with high quality durable materials with a high-resistance tank that have even protection for longer durability. The product safety features are made in Italy, hence making it a safe product of consumer's choice.
